

ELT 209: Motor Control I

This course introduces the use of motor control symbols, magnetic motor starters, running overload protection, push-button stations and sizing of magnetic motor starters and overload protection. Topics include sizing magnetic starters and overload protection and the use of push-button stations, ladder diagrams and magnetic motor starters in control of electric motors. Upon completion, students should be able to understand the operation of magnetic motor starters, overload protection and interpret ladder diagrams using push-button stations.

Credits: 3
