

E-Learning

WCCS offers a number of E-Learning (Internet Based) courses in several academic disciplines. The content of each of these courses is identical to the content of traditional classroom courses because of requirements established by the Statewide Articulation and Reporting System (STARS), and the Southern Association of Colleges and Schools. Therefore, all WCCS E-Learning courses are transferable to senior colleges and universities. Students should refer to the listing of E-Learning course offerings in the schedule of classes.
